Congratulations! You’re taking a great step towards improving your sleep by trying Ebb.

Ebb is the first, smart-technology and drug-free device that uses a proprietary cooling headband to precisely maintain the forehead at a cool temperature ideal for a good night’s sleep. The Ebb technology is based on extensive clinical data and 20+ years of sleep imaging research.

Relief from sleeplessness can take time and commitment. And you’re not alone. We’re here to help you get the best possible results.

Have questions? Email us at: customercare@ebbsleep.com or call 1-800-381-1145.
Do not block the inlet or outlet areas of the enclosure and keep at least one foot of clearance around all sides of the bedside controller to prevent overheating.

Do not place Ebb bedside controller on the floor where it can be bumped or where someone is likely to trip over the power cord.

Not for use in an oxygen-rich or flammable anesthetic environment.

To avoid electrical shock, always unplug the power cord from the wall before cleaning the bedside controller. Do not drop or place the bedside controller in any fluids or allow fluids to enter vent openings.

If you notice any of the following, disconnect power from the bedside controller and contact Ebb Customer Care.

- Changes in the performance of Ebb
- Unusual or harsh sounds
- If the bedside controller has been dropped or mishandle
- If the enclosure of the bedside controller is broken.

There are no user-serviceable components inside the device. Do not attempt to open the bedside controller.

• Read the entire manual before use.
• Some individuals may experience skin redness on the forehead after wearing the forehead pad. If this persists more than 12 hours, contact Ebb Customer Care.
• The headband must be worn in the proper orientation to prevent entanglement and strangulation.
• The headband must be routed above the pillow to prevent entanglement and strangulation. Improper routing could cause a kink and result in loss of therapy.
• Patients with cold sensitivity reactions such as Raynaud's Disease should consult their doctor before using cooling therapies in order to avoid cold sensitivity reactions that may include cold sensations, color changes in the skin in response to cold, a numb prickly feeling or stinging pain upon warming.
• If you have a skin condition on your forehead that may make wearing the headband uncomfortable, please check with your doctor before use.
• Do not use Ebb if the package or any part is damaged. Contact Ebb Customer Care.
• Route the electrical cord to prevent a tripping hazard or being entangled with furniture.
CAUTION
Cautions alert the user to important information regarding use of Ebb.

- Improper placement of the headband can result in reduced therapy.
- The safety and effectiveness of Ebb in pregnant women has not been established.
- Use only fluid cartridges provided by Ebb Therapeutics to assure proper performance. Make sure the fluid cartridge is in the bedside controller before initial use.
- Do not expose Ebb to temperatures below freezing as fluid could freeze and damage the device.
- Before each use, make sure the headband tubing is properly connected to the back of the bedside controller.
- Ebb is designed for indoor use only.
- If the headband becomes dirty, worn, torn or leaks, discontinue use and contact Ebb Customer Care for a replacement.
- Do not use accessories other than those described in this manual.

Note: Ebb is not made with natural rubber latex.

To Help You Get Started on Ebb

- For support please contact Ebb Customer Care at (800) 381-1145.
Ebb

Device Description

Ebb is the first smart-technology and drug-free wearable device that uses a proprietary cooling headband to naturally trigger a reduction in brain activity, which quiets the racing mind to help people with sleeplessness to fall asleep faster and get in to deeper stages of more restorative sleep faster.

Ebb includes a bedside controller, headband, fluid cartridge, and power supply.

The intelligent bedside controller precisely regulates within the validated therapeutic temperature range (59-64°F). The comfortable one-size-fits-all headband delivers consistent temperature and even cooling therapy across the forehead throughout the night.

Bedside Controller

Headband

Fluid Cartridge

Power Supply

**Before First Use**

Unpack and familiarize yourself with Ebb.

---

**WARNING:**
Do not use Ebb if the package or any part is damaged. Contact Ebb Customer Care Team.

**CAUTION:**
Ebb is designed for indoor use only.

---

Front of Bedside Controller

Back of Bedside Controller
1 Set Up
Place the bedside controller on a hard, flat surface at the height of your pillow and near a wall outlet. Always place the bedside controller on a hard, flat surface in a well-ventilated area. Keep the vents clear of obstructions.

WARNING:
• Ebb should not be used close to or stacked with other electrical equipment.
• Do not block the inlet or outlet areas of the enclosure and keep at least one foot of clearance around all side of the bedside controller to prevent overheating.
• Do not place Ebb bedside controller on the floor where it can be bumped
• Not for use in an oxygen-rich or flammable anesthetic environment or where someone is likely to trip over the power cord.
• Route the electrical cord to prevent a tripping hazard or being entangled with furniture.
• Do not position Ebb so it is difficult to unplug the power cord from the electrical outlet.
• Do not use extension cords.
• Use only a power supply provided by Ebb Therapeutics. Use of any other power supply may result in increased emissions or decreased protection of Ebb device which could impact the performance of the unit. Keep the power supply away from hot surfaces.
• Ebb is isolated from the mains by means of the supplied medical grade power supply. Do not use a power supply other than the one supplied with the system.

2 Connect Headband
Insert headband to back of bedside controller until you feel it click.

CAUTION:
Before each use, make sure the headband tubing is properly connected to the back of the bedside controller.
CAUTION:
Use only fluid cartridges provided by Ebb Therapeutics to assure proper performance. Make sure the fluid cartridge is in the bedside controller before initial use.

WARNING:
Do not use Ebb if the package or any part is damaged. Contact Ebb Customer Care Team.

3 Insert Fluid Cartridge

- Remove orange cap from fluid cartridge before inserting.
- Open lid.
- Insert fluid cartridge and hold down.
- Hold down and turn to lock position.
- Knob is in locked position. Wait 30 seconds before using bedside controller.

4 Connect Power Supply

- Plug the end of the power cord into the power supply.
- Plug the power supply fully into the connector on the back of the bedside controller. Note: The connection is intentionally snug. The power supply is installed correctly when you can no longer see the metal portion of the connector.

CAUTION:
Use only fluid cartridges provided by Ebb Therapeutics to assure proper performance. Make sure the fluid cartridge is in the bedside controller before initial use.

WARNING:
Do not use Ebb if the package or any part is damaged. Contact Ebb Customer Care Team.
**Display**

When in use at night, the display disappears. Rotate the dial to wake the display. When the clock is displayed, rotate counter-clockwise to dim the display and clockwise to make it brighter.

**Fluid Cartridge Replace**

**Clock/Alarm Buttons**

**Dial**

**Time**

**Gentlewake**

**Warmer**

**Cooler**

**Alarm**

**5 Set the Clock**

Open lid to access clock buttons. Press and release the “Set Clock” button.

- **The hours begin blinking.** Turn dial to correct hour with AM or PM.
- **Press the “Set Clock” button.**
- **The minutes will begin to blink.** Turn dial to the correct minute.
- **Press “Set Clock” button to set clock time.**

Replace

00:00

6:00

Alarm

00:00

pm

7:00

7:35

7:35
6 Set Wake Time
Open lid to access clock buttons.
Press and release the “Set Alarm” button.
The hours begin blinking. Turn dial to set hour with AM or PM.

7 Turn on Gentlewake
Open lid to access clock buttons.
Press “Gentlewake on/off” button. A sun icon will appear when the Gentlewake feature is on.
The Gentlewake feature turns off the cooling therapy 30 minutes before the wake up time you set.

8 Turning System On and Off
Push and hold dial to turn the device “ON” or “OFF”
Select Temperature

When the device is on, turn the dial to the desired profile setting. P1 (coldest) - P10 (warmest).

The display shows the letter “P”, for Temperature Profile, along with a number between 1-10, where 1 is coldest and 10 is warmest.

As you turn the dial to make warmer, an orange up arrow appears, to make cooler, a blue down arrow appears. It could take up to 10 minutes to reach the temperature for the selected profile.

It is recommended to set your temperature control at P5 on the first use of the device.

Applying Headband

Hold the tubing with one hand above your forehead with the forehead pad facing you and use the other hand to stretch the headband over the back of your head.

Tubing should be routed upwards and over your head. Position the headband above your eyebrows and flat across your forehead.

Use the adjustment tabs on the back of the headband to tighten. The back of the headband should sit low and at the base of the back of your head.

Adjust the headband tight enough to not slip off your forehead but not too tight that it is uncomfortable.

If you have long hair, pull your hair up in a ponytail and position the headband below your ponytail.

WARNING:
• Some individuals may experience skin redness on the forehead after wearing the forehead pad. If this persists more than 12 hours, contact Ebb Customer Care.
• The headband must be worn in the proper orientation to prevent entanglement and strangulation.
• If you have a skin condition on your forehead that may make wearing the headband uncomfortable, please check with your doctor before use.
**Tube Placement**

Ebb Therapeutics recommends running the tubing between your mattress and headboard (or wall) to help hold the tubing when moving around during sleep.

If you prefer a quiet background in your bedroom, you can use ear plugs to complement Ebb.

**Cleaning**

The bedside controller can be wiped down with an alcohol wipe.

Allow the bedside controller to dry completely before plugging in the power cord.

**WARNING:**

To avoid electrical shock, always unplug the power cord from the wall before cleaning Ebb.

**WARNING:**

Do not drop or place Ebb in any fluids. Do not allow any fluids to enter the openings of Ebb.

**Precaution:** If you notice a change in functioning of Ebb, please contact Ebb Customer Care.

The forehead pad (plastic pad that comes into contact with your skin) may be wiped down between uses with an alcohol wipe.

The Ebb headband should not be hand washed or placed in a washing machine as this may impact performance.

If you experience problems with the headband, please contact Ebb Customer Care.

**Note:** The Ebb headband is expected to last 90 days before replacement is needed.

**WARNING:**

The headband must be worn in the proper orientation and the tubing must be routed above the pillow to prevent entanglement and strangulation. Improper routing could cause a kink in tubing and result in loss of therapy.
Replacing the Fluid Cartridge

The circulating fluid in Ebb naturally evaporates. After about three months of use, the fluid needs to be replenished by inserting a new fluid cartridge. When the fluid gets low, the water drop icon appears on the left side of the display.

Fluid Cartridge

At 2 weeks from refill, a water droplet appears on the display.

At 1 week from refill, the display will read “replace”.

When the fluid cartridge is empty, the bedside controller will stop working. The headband can be replaced as needed. The fabric will wear from normal use. You can purchase a new fluid cartridge and headband by calling (800) 381-1145.

CAUTION:
Do not use accessories other than those described in this manual.

Service Life

The expected service life of the Ebb system is 3 years. If the device stops cooling or circulating the fluid or begins to leak, it is time to replace the device.

The expected service life of a fluid cartridge is 3 months. The device will provide an indication when the fluid is low and the cartridge needs to be replaced.

The expected service life of the headband is 6 months. The headband should be replaced when it becomes dirty, discolored or if it begins to leak.

Disposal

Separate collection for electrical and electronic equipment per EC Directive 2002/96/EC. Dispose of Ebb in accordance with local regulations.
## Troubleshooting

If there is a problem, first try the following suggestions. There are no user-serviceable components inside the device. Do not attempt to open the bedside controller. This will void the warranty.

**Ebb Customer Care:** 800-381-1145

### Problem | Solution
--- | ---
**Controller not turning on** | 
Power is not connected | Ensure the power supply is connected to the power outlet.

**Error message “85” and Unit Shuts Down** | 
Device has been left in a cold environment | Allow bedside controller to warm up before re-use. Disconnect power and then reconnect to restart bedside controller.

**Error Message “86” and Unit Shuts Down** | 
Fluid cartridge is out of fluid | Check the icons on the display to see if the water droplet icon and replace words are illuminated.

**Error Message “87” and Unit Shuts Down** | 
Device has been left in hot environment | Allow bedside controller to cool down before re-use. Disconnect power and then reconnect to restart bedside controller.

**Error Message “88” or “82” and Unit Shuts Down** | 
There is a problem with the bedside controller | Disconnect the power cord and then plug back in. If error code repeats, contact Ebb Customer Care Team to arrange for additional support.
### Technical Description

<table>
<thead>
<tr>
<th>Specification</th>
<th>Details</th>
</tr>
</thead>
</table>
| Rated Voltage | AC Power Input 100-240V, 50/60Hz 1.2A  
DC Power 12V/DC 7.5A  
Fuses: There are no user-replaceable fuses. |
| Isolation from Supply Mains | Ebb is isolated from the mains by means of the supplied medical grade power supply. |
| Rated Power | 90 Watts |
| Ambient Temperature (Operating) | +14°C to +24°C (57°F to 75°F)  
Note: Usage above 24°C (75°F) may impact the time to reach temperature set point. |
| Ambient Temperature (Storage/Transport) | +5°C to +30°C (41°F to 86°F) |
| Humidity (Operating) | 15% to 75% Relative, non-condensing  
Note: Usage above 75% humidity may impact the time to reach temperature set point. |
| Humidity (Storage) | 15% to 95% Relative, non-condensing |

### Specification

- **Ebb** was tested to IEC 60601-1  
  Medical Equipment – General Requirements for Safety  
  Type of Protection Against Electric Shock: Class II Equipment  
  Degree of Protection Against Electric Shock: Type BF Applied Part  
  Degree of Protection against Ingress of Water: Keep Dry  
  Mode of Operation: Continuous

- **Ebb** was tested to IEC 60601-1-2  
  Electromagnetic Compatibility

- **Ebb** was tested to ISO 10993  
  Biomedical Evaluation and Testing

- **Barometric Pressure**  
  574.0 to 760.0 mm Hg (approximately zero to 7,500 feet above MSL)

- **Device Size**  
  \( \frac{3}{4} \text{"} \times \frac{3}{4} \text{"} \times \frac{1}{2} \text{"} \) approximately 5.7 pounds

- **Applied Parts**  
  Headgear and unit enclosure
Electromagnetic Compatibility

Ebb complies with all applicable electromagnetic compatibility requirements (EMC) IEC 60601-1-2 4th edition and meets the Class B Group 1 emissions requirements in CISPR 11. Ebb has met the Home Healthcare Immunity requirement levels.

**EMC in the Home:**

**WARNING:**
Portable radio frequency communications equipment (including items such as antenna cables and external antennas) should be used no closer than 12 inches to any part of Ebb, including cables specified by the manufacturer. Otherwise, loss of the performance of this equipment could result.

- Ebb must be installed and put into service according to the Electromagnetic Capabilities (EMC) information provided in this manual.
- Mobile radio-frequency communications equipment can affect the device.
- Ebb may shut down or display an error code if the device experiences a radio-frequency interference caused by another electronic device. Under these conditions, the user should move mobile devices that may cause radio waves that effect the normal operations of Ebb and then continue use.

**EMC Accompanying Document**

Ebb requires special precautions regarding EMC and needs to be installed and put into service according to the EMC information provided in these accompanying documents.

**WARNING:**
A risk of increased emissions or decreased immunity may result if any additional cables are attached.

Use of this equipment adjacent to or stacked with other equipment should be avoided because it could result in improper operation. If such use is necessary, this equipment and the other equipment should be observed to verify that they are operating normally.

Use of accessories, transducers and cables other than those specified or provided by the manufacturer of this equipment could result in increased electromagnetic emissions or decreased electromagnetic immunity of this equipment and result in improper operation.

---

</tbody>
</table>

Portable and mobile RF communications equipment should be used no closer to any part of Ebb, including cables, than the recommended separation distance calculated from the equation applicable to the frequency of the transmitter. Recommended separation distance:

\[ d = \frac{6}{E} \sqrt{P} \]

where \( E \) is the field strength in V/m, \( d \) is the recommended separation distance in meters (m), and \( P \) is the maximum output power rating of the transmitter in watts (W) according to the transmitter manufacturer. Interference may occur in the vicinity of equipment marked with the following symbol:

NOTE: These guidelines may not apply in all situations. Electromagnetic propagation is affected by absorption and reflection from structures, objects and people.

For transmitters rated at a maximum output power not listed above, the recommended separation distance \( d \) in meters (m) can be estimated using the equation applicable to the frequency of the transmitter, where \( P \) is the maximum output power rating of the transmitter in watts (W) according to the transmitter manufacturer.

**Recommended separation distances between portable and mobile RF communications equipment**

<table>
<thead>
<tr>
<th>Rated maximum output power of transmitter (W)</th>
<th>Separation distance according to frequency of transmitter (m)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80 to 800 MHz</td>
<td>( d = \frac{3.5}{10} \sqrt{P} )</td>
</tr>
<tr>
<td>800 MHz to 2.7 GHz</td>
<td>( d = \frac{7}{10} \sqrt{P} )</td>
</tr>
<tr>
<td>710, 745, 780</td>
<td>( d = \frac{6}{9} \sqrt{P} )</td>
</tr>
<tr>
<td>385, 450, 810, 870, 930, 1720, 1845, 1970, 2450</td>
<td>( d = \frac{6}{28} \sqrt{P} )</td>
</tr>
</tbody>
</table>

**NOTE 1:** At 80 MHz and 800 MHz, the separation distance for the higher frequency range applies.

**NOTE 2:** These guidelines may not apply in all situations. Electromagnetic propagation is affected by absorption and reflection from structures, objects and people.
Limited Warranty

Ebb Therapeutics Inc. ("Ebb") warrants that Ebb and Replenish kit (collectively referred to as the “Product”) shall be free from defects of workmanship and materials from the date of purchase for the period specified below (the “Warranty Period”):

- Ebb: one (1) year from the date of purchase by the end user (Bedside Controller only)

If the Product fails under normal conditions of use and the Product is returned to Ebb Therapeutics within the Warranty Period, Ebb Therapeutics will repair or replace the defective Product with a new or refurbished Product, at Ebb Therapeutics’s sole discretion. This warranty is non-transferable and only applies to the original end user of the Product. The foregoing replacement remedy will be the sole remedy for breach of the foregoing warranty. This warranty does not cover damage caused by accident, misuse, abuse, negligence, alteration, failure to use or maintain the Product under conditions of normal use and in accordance with the terms of the product literature, and other defects not related to materials or workmanship. This warranty does not apply to any Product that may have been repaired or altered by anyone other than Ebb Therapeutics. Ebb Therapeutics disclaims all liability for economic loss, loss of profits, overhead, or indirect, consequential, special or incidental damages which may be claimed to arise from any sale or use of the Product. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER EXPRESS WARRANTIES. IN ADDITION, ANY IMPLIED WARRANTY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, IS SPECIFICALLY DISCLAIMED. SOME STATES DO NOT ALLOW DISCLAIMERS OF IMPLIED WARRANTIES, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE.

To exercise your rights under this limited contact Ebb Therapeutics, Inc.

FCC Rules

Information for Users of FCC Part 15, Class B Devices

Compliance

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or experienced radio/TV technician for help.

Modifications:

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
